

Marijuana Wax

What is it?

Marijuana Wax

- Also known as..
- Ear Wax
 - Honeycomb
 - Dabs
 - BHO
 - Honey Oil
 - Butter
 - Hash Wax
 - Hash Oil

How is it Made?

Marijuana is placed into a long tube or pipe, which is then hit with a rush of highly flammable butane—The butane is used to extract THC, (marijuana's psycho-active ingredient) in a hardened, extremely potent form that resembles wax. This process has led to home explosions, burn injuries and death.

What does it do?

- Hallucinating
- Psychotic Breaks
- Hearing Things
- Tactile Sensations
- Unconsciousness
- Hospitalization
- Extreme paranoia
- Impaired Reflexes
- Impaired Judgment

- Consistency of lip balm

- Easily concealed in lip balm containers or jars
- Can be eaten or smoked using a bong , electronic cigarette or vaporizer

- Regular Marijuana is approximately 14% THC. Marijuana wax is from 70-99% pure THC. Making the highs instant, longer , and much more intense. The high with Marijuana Wax can become extremely uncomfortable and require hospitalization.
